Date :2009-07-01 1 1st print version 2009-07-01 this book in the choice experiments seek a comprehensive response to these basic requirements. will all be divided into 32 experimental electrochemical analysis (including potential. Coulomb. VA). molecular spectroscopy (including ultraviolet - visible. infrared. fluorescence). atomic spectroscopy (including atomic emission. atomic absorption. atomic fluorescence). chromatography (including gas chromatography. liquid chromatography ) and other instrumental analysis of five chapters. By taking into account the characteristics of school hours or school restrictions. all students have the opportunity to complete the book difficult to incorporate all the experiments. it is difficult to directly access and use of all analytical instruments. in the sixth chapter of the book is 24 preferred class of analytical instruments some domestic and imported models. its basic characteristics and operating methods for the profile. Contain the beginning of each chapter summary of relevant content. covering the basic principles of various types of instrumental analysis. instrument structure. qualitative and quantitative methods and related formulas. suitable for analysis and the basic principles of sample handling. instrument operation with the general principles. experience and precautions. etc. in each experiment is accompanied by thinking about problems. Make this book a complete system in the experimental materials. but also as instrumental theoretical study of the review is both comprehensive and concise information. and become the reference guide for future work. Contents: Chapter 1.1 Electrochemical analysis of experimental Coulomb potential analysis 1.2 Analysis 1.3 voltammetry analysis experiment 1 H<sub>2</sub>SO<sub>4</sub>-H<sub>3</sub>PO<sub>4</sub> mixed acid titration experiment 2 beer in Experiment 3 Determination of total acid fluoride ion selective electrode for the determination toothpaste The fluoride test 4 coulometric titration experiments vitamin C 5...
