

Fao Species Identification Sheets for Fishery Purposes

By Food and Agriculture Organization of the

CD-ROM. Book Condition: New. Not Signed; This CD-ROM contains the electronic version of the FAO Species Identification Sheets for Fishery Purposes for the Western Indian Ocean (Fishing Area 51) published in 6 volumes in 1984. The Identification Sheets are aimed at establishing an annotated illustrated inventory of aquatic species of interest to fisheries; they cover the species of the major marine resource groups exploited in the Western Indian Ocean. The marine resource groups included are the bony fishes, chimaeras, sharks, batoid fishes, lobsters, shrimos and sea turtles. The sheets provide fishery workers with a tool for the correct identification of the species occurring in their area. Navigation between and within volumes is facilitated through the use of bookmarks. [Adobe(r)Reader(r) required]. book.

Reviews

Simply no phrases to clarify. It is really basic but surprises from the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Mr. Noah Cummerata IV

Certainly, this is actually the greatest job by any publisher. It is really simplistic but shocks within the 50 % of the pdf. I am just happy to tell you that this is the very best ebook i have read in my own lifestyle and may be he greatest ebook for actually.

-- Marge Jacobson MD
