Reviews

Completely essential read through publication. It normally does not expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.

HANDBOOK OF FOOD PROCESS DESIGN

Wiley-Blackwell, 2012. Hardcover. Book Condition: New. 19.4 x 25.3 cm. "This book will offer a comprehensive account of the design of all major food processing systems, including both established and novel unit operations. The range of equipment available for any given process will be described, including the basic theoretical principles and modes of operation. Advantages and limitations of the equipment within various relevant parameters (such as size, processing time, cost and energy requirements) will be explained and schematic diagrams will be provided to show the stages of each process component in detail. The book also covers computer-aided design and control systems, cost considerations and cleaning and sanitation methods. Practical examples of process design scenarios will be included to help the reader in specifying and designing their own operations. All chapters will follow the following format: 1. Purpose of unit operation 2. What are the end products of the process? 3. Process flow sheet, material and energy balances, and schematic diagram of the process and its components 4. Basic theoretical principles and mode of operations 5. Different types of equipment available with their advantages and limitations. What are the parameters we need to know? For example, time, energy, size, and other factors 6. Empirical data and rules of thumb used to facilitate the various design calculations, simplified equations and shortcut methods 7. Simple equations, tables, and graphs to estimate the design parameters 8. Process control, operations and maintenance of the unit operations 9. Advanced levels of process design for complicated systems. Computer aided process/plant design 10. Cleaning and sanitation methods 11. Capital and operating cost for different size of the equipments 12. Summary and future needs 13. Worked out examples related to design"-- Our orders are sent from our warehouse locally or directly from our international distributors to allow us to offer you the best possible price and delivery time.
