Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 edition. Excerpt: .7 77 77 3: II = tripl ratio of a pair of homol edges. THEOREM (r7)--If four lines are proportional, and if similar polyhedra are similarly described on the first pair as edges, and similar polyhedra are similarly described on the second pair as edges, then as the polyhedron on the first is to the polyhedron on the second so is the polyhedron on the third to the polyhedron on the fourth; and, conversely, if two similar polyhedra have the same ratio as two other polyhedra, similar to each other, then similar edges of the first pair have the same ratio as similar edges of the second pair. LEMMA--If two ratios are equal, their triplicates are equal; and conversely. Let A, B, C, D, P, Q, X, Y be magnitudes such that, A: B = B: C, C: D = D: P = P: Q. r, if A: B = C: D, then B: X = D: P, and X: Y = P: Q, whence, compounding the ratios, we get A: Y = C: Q, i. e. triplicate of A: B = triplicate of C: D. 2, if A: Y = C: Q, assume that A: B = C: a. = u.: B = B: (. A: Y = C: y. -y = Q. (r) Now if a. D, then B P, and. . yQ; which contradicts (1). And if u. D, then B P, and 7 O; which again contradicts (1). It remains that u. D. A: B = C: D. Now let AB, CD, LM, NO be four given lines. On AB, CD...
