Much of my research work has been devoted to a study of the chemistry of bacteria. I have not succeeded in exhausting this field, and it is probable that I have falsely estimated even the meagre results which I have obtained, but I offer my contribution with the hope that it may induce others to enrich it. As my purpose in the start was to study the chemistry of bacterial cellular substance, my first task was to secure this material in large amounts, and fairly free from contamination. After many failures, I succeeded in doing this by means of my tanks for massive cultures, the construction and operation of which I will demonstrate by slides at the close of the hour. I have been able to...
